

# FEMA Hoboken Flood Map

Best Available Flood Hazard Data  
released June 17, 2013

## Floodplain Area AE

Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas; no depths or base flood elevations are shown within these zones.

## Floodplain Area Shaded X

Area of moderate flood hazard, usually the area between the limits of the 100-year and 500-year floods. Are also used to designate base floodplains of lesser hazards, such as areas protected by levees from 100-year flood, or shallow flooding areas with average depths of less than one foot or drainage areas less than 1 square mile.

## Floodplain Area VE

Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage.

## Unshaded Area

Area of minimal flood hazard, usually depicted on FIRMs as above the 500-year flood level.

Limit of Moderate  
Wave Action (LiMWA)
